Veterinary Clinic

Owners Handout – Week 1

EAST FREMANTLE VET CLINIC

PUPPY PRESCHOOL

Enriching your puppy's environment

- Encourage your dog to use mental and physical energy while eating their daily food requirements:
 - Fill Kongs® or other foraging devices such as Buster Cubes® or treat balls with age appropriate food
 - Scatter the daily dry meal allowance over the lawn rather than in a bowl – the puppy will have to sniff out and find every piece of kibble
 - On hot days give your puppy treats frozen in large ice cubes
- Alternate toys regularly, perhaps each day. Examples of toys are:
 - Rope toys
 - Squeaky toys
 - Large solid balls
 - Durable tug toys tied up in yard
 - A car tyre hanging in the back yard on a rope
- Fill a child's plastic pool with water
- Have another dog that your dog gets along with over to visit
- Take your dog out in the car
- Give your dog a daily training session or walk.
